Help Repair the Ocean View Path

Dear Mayor Mathews and Santa Cruz City Council:

We urge the city council to fully fund and assign a high priority in 2006 to rebuilding the path from Ocean View Park to East Cliff drive. This path has become a safety hazard and poses a liability to the city as well as an obstacle to the many people who use this path every day.

Walkers, joggers, bike riders, children from Familia Center, and especially parents with strollers use this path. It is the only way for people in the lower ocean neighborhood to access our beautiful park. This path is the most efficient way for people in our greater neighborhood to reach Seabright beach, the beach-Boardwalk area, the trails along the levee, and the Skate Park when it is completed.

The Parks Department has obtained a preliminary estimate for rebuilding this dangerous trail into an ADA compliant path that would serve everyone well—bike riders and pedestrians. For less than $20,000 this work can be done. Please make sure it is a priority in the upcoming budget for the Parks department.
